

## No Sensors

The ONLY Crowd Intelligence solution that does not require costly single-purpose sensors or rely on expensive cameras

## Remote Deploy

Software-only solution means we can deploy 100% remotely – and limit and in-person exposure or contact during the COVID-19 pandemic

## Valuable IP

Unique Intellectual Property covers areas from data fusion to artificial intelligence/machine learning, as well as an ability to simulate and predict human behavior over time

## About Us: Armored Things

Armored Things provides Software-as-a-Service (SaaS) solutions for crowd intelligence. By combining data from existing security and IT systems with predictive analytics, we provide facilities management teams with a real-time visual representation of people and flow within any campus or venue space.

Easy-to-use dashboards equip clients to anticipate changes and inform decisions to improve service, operations, staffing and security. Since our founding in 2016, Armored Things has built a team of security and technology experts to deliver world-class solutions to stadiums, corporations, and campuses around the country. As a team, we're pushing technology towards a safer future.
